

Test your knowledge on taking action with data

1. A data analyst works for an engineering company, which specializes in aircraft design and development. They help their employer choose the best places to advertise, which include a podcast about the latest trends in airplane engineering and a magazine published by an aviation engineering association. What does this scenario describe?

1 / 1 point

- ☐ Adhering to a budget
- ☐ Structured thinking
- ☒ Reaching a target audience
- ☐ Data-driven decision-making

✓ Correct

This scenario describes reaching a target audience. A target audience is the specific people you're trying to communicate with.

2. Which step of the data analysis process includes collecting data for analysis?

1 / 1 point

- ☐ Ask
- ☐ Share
- ☒ Prepare
- ☐ Process

✓ Correct

The prepare step includes collecting data for analysis.

3. Fill in the blank: When data professionals _____ data, they eliminate inaccuracies by transforming the data into a more useful format and removing outliers.

1 / 1 point

- ☐ store
- ☐ query
- ☐ analyze
- ☒ clean

✓ **Correct**

When data professionals clean data, they eliminate inaccuracies by transforming the data into a more useful format and removing outliers. Data cleaning takes place during the process step of the data analysis process.

4. Which of the following activities are part of the share step of the data analysis process? Select all that apply.

0.75 / 1 point

- ☒ Use visuals to help people understand data insights

✓ **Correct**

During the share step of the data analysis process, data professionals summarize results, often using visuals to help people understand data insights.

- ☒ Make recommendations

✗ **This should not be selected**

During the share step of the data analysis process, data professionals summarize results, often using visuals to help people understand data insights. Making recommendations occurs during the act step.

- ☐ Define the problem to be solved

- ☒ Summarize analysis results

✓ **Correct**

During the share step of the data analysis process, data professionals summarize results, often using visuals to help people understand data insights.
