

Module 1 challenge

1. Fill in the blank: When solving the _____ problem type, a data professional team at a bank analyzes financial market data from the past six months. They then use this information to understand what led to certain fluctuations and what is likely to cause them again.

1 / 1 point

- ☐ identifying themes
- ☐ categorizing things
- ☐ discovering connections
- ☒ finding patterns

✓ Correct

2. Which of the following statements correctly describe the SMART methodology? Select all that apply.

1 / 1 point

- ☒ SMART stands for specific, measurable, action-oriented, relevant, and time-bound.

✓ Correct

- ☒ Measurable questions can be quantified and assessed.

✓ Correct

- ☒ Time-bound questions specify the time to be studied.

✓ Correct

- ☐ Specific questions are highly technical and detailed.

3. A software company wants to deliver better user experiences for their customers. They gather data on their customers' current interaction behaviors on their platform. They use this data to develop an algorithm to identify optimal design elements for the next software release. Which data problem type does this scenario describe?

1 / 1 point

- ☐ Categorizing things
- ☒ Making predictions
- ☐ Spotting something unusual
- ☐ Discovering connections

✓ Correct

4. For what reasons would it be unfair for a supermarket to ask customers, “Why do you believe our products are the best on the market?” Select all that apply.

1 / 1 point

☒ It is a leading question.

✔ Correct

☐ It is difficult to understand.

☒ It makes assumptions.

✔ Correct

☐ It is a closed-ended question.

5. Fill in the blank: When solving the _____ problem type, a data analyst discovers an established competitor suddenly changing its marketing strategy.

1 / 1 point

- ☐ making predictions
- ☐ discovering connections
- ☒ spotting something unusual
- ☐ identifying themes

✔ Correct

6. A junior data analyst sorts sales data by product category. Then, they group that information into broader concepts, such as customer demographic and geographic region. Which data problem type does this scenario describe?

1 / 1 point

- ☒ Identifying themes
- ☐ Finding patterns
- ☐ Discovering connections
- ☐ Making predictions

✔ Correct

7. Which of the following questions are open-ended? Select all that apply.

1 / 1 point

☐ On a scale of 1-10 (with 10 being highest), how interested are you in current events?

☐ Is it difficult for you to speak in public?

☒ What are the three most important life lessons you have learned?

✔ Correct

☒ How would you describe this book?

✔ Correct

8. The supplier of a key component of a variety of products has a quality control issue. This causes problems for both the supplier and the manufacturing companies that use the component in their products. All of the affected businesses discuss the issues they face and share data openly, ultimately discovering they have many similar challenges. What data problem type are they solving?

1 / 1 point

- ☐ Categorizing things
- ☐ Making predictions
- ☐ Identifying themes
- ☒ Discovering connections

✓ Correct

9. Fill in the blank: The question, “Which aspects of our packaging can be updated in order to make our product more customer-centric?” is _____ because it encourages change.

1 / 1 point

- ☐ measurable
- ☐ specific
- ☒ action-oriented
- ☐ relevant

✓ Correct

10. A data analytics team at a construction company wants to determine what types of materials are used in bridges that need frequent maintenance. They review bridge maintenance records and the construction materials used in each. Then, they group sturdier materials in one cluster and less sturdy materials in another. Which data problem type does this scenario describe?

1 / 1 point

- ☒ Categorizing things
- ☐ Discovering connections
- ☐ Finding patterns
- ☐ Spotting something unusual

✓ Correct
