

Test your knowledge on following the evidence

1. Stakeholders at a utility company request insights summarizing the past month's business results. The information will include high-level, historical data about electricity usage. What type of deliverable should the data team provide?

1 / 1 point

- ☐ Proposal
- ☐ Contract
- ☒ Report
- ☐ Dashboard

✔ **Correct**

They should provide a report. A report is a static collection of data given to stakeholders periodically. It typically contains high-level, historical data that is cleaned and sorted.

2. What are some key benefits of dashboards? Select all that apply.

0.5 / 1 point

- ☒ Easy access for stakeholders

✔ **Correct**

Benefits of dashboards include the ability to monitor live data, easy access, and low maintenance.

- ☐ Low maintenance

- ☒ Data enters the dashboard precleaned

✘ **This should not be selected**

Benefits of dashboards include the ability to monitor live data, easy access, and low maintenance. The data used in a dashboard may not be precleaned and sorted, so the data professional may be required to do so.

- ☒ Ability to monitor live data

✔ **Correct**

Benefits of dashboards include the ability to monitor live data, easy access, and low maintenance.

3. Fill in the blank: A data analyst creates a pivot table when using _____ in order to summarize, count, or average data from a worksheet.

1 / 1 point

- ☐ statistical software
- ☐ coding languages
- ☒ spreadsheets
- ☐ SQL

✔ **Correct**

A data analyst creates a pivot table when working with spreadsheets in order to summarize, count, or average data.

4. A supervisor presents their data team with a clear objective that was set by company decision-makers and will be evaluated and measured. The data team then uses this objective to drive a work project. What does this scenario describe?

1 / 1 point

- ☒ Using a metric goal
- ☐ Data-driven decision-making
- ☐ Cross-team collaboration
- ☐ Using a single, quantifiable type of data

✔ **Correct**

This scenario describes using a metric goal. A metric goal is a measurable goal set by a company and evaluated using metrics.
