

Test your knowledge on connecting the data dots

1. What are some characteristics of small data? Select all that apply.

1 / 1 point

☐ Has a significant impact on large frameworks

☒ Likely to focus on specific metrics

✔ Correct

Small data tends to focus on specific metrics, is organized and analyzed using spreadsheets, and can be useful when making day-to-day decisions.

☒ Often organized and analyzed using spreadsheets

✔ Correct

Small data tends to focus on specific metrics, is organized and analyzed using spreadsheets, and can be useful when making day-to-day decisions.

☒ Useful when making day-to-day decisions

✔ Correct

Small data tends to focus on specific metrics, is organized and analyzed using spreadsheets, and can be useful when making day-to-day decisions.

2. Fill in the blank: Big data typically involves large datasets containing data from long _____, which has to be organized before analysis.

1 / 1 point

☐ sales campaigns

☐ research projects

☐ business presentations

☒ time periods

✔ Correct

Big data typically involves large datasets containing data from long time periods, which has to be organized before analysis.

3. A data professional works with data that is stored in a database. They use SQL to sort and analyze it in order to ensure the insights are as accurate as possible. What type of data are they most likely using?

1 / 1 point

- ☒ Big
- ☐ External
- ☐ Internal
- ☐ Small

✓ **Correct**

They are most likely using big data. Big data is typically stored in a database and requires SQL for sorting and analysis. Spreadsheets are more effective when using small data.

4. When considering the benefits and challenges of big data, which of the “four V words” describe the amount of data being analyzed?

0 / 1 point

- ☐ Velocity
- ☐ Variety
- ☒ Veracity
- ☐ Volume

✗ **Incorrect**

Volume describes the amount of data being analyzed. Veracity refers to the quality and reliability of the data.
