

Module 2 challenge

1. A data team at a community center automates a process to segment clients. First, a list of all clients is compiled. Then, they are sorted by the classes they have taken and events attended. Finally, clients are segmented by their activity histories. What does this scenario describe?

0 / 1 point

- ☐ Creating an algorithm
- ☐ Using a formula
- ☐ Making a pivot table
- ☒ Data-inspired decision-making

✗ Incorrect

Review [the video about data and decision-making](#) ↗.

2. Which of the following statements accurately describe qualitative and quantitative data? Select all that apply.

0.75 / 1 point

☒ The smell of lavender is an example of qualitative data.

✔ Correct

☒ The height of a suspension bridge is an example of quantitative data.

✔ Correct

☐ Quantitative data involves things that cannot be measured using numerical data.

☒ Qualitative data involves information that can be quantified.

✘ This should not be selected

Review [the video about different kinds of data](#) ↗.

3. When working with big data, analysts consider the variety of data within large, complex datasets. What does this entail?

0 / 1 point

☒ Evaluating the quality and reliability of the data

☐ Understanding how quickly the data can be processed

☐ Assessing the amount of data available

☐ Identifying the different kinds of data included

✘ Incorrect

Review [the reading about big and small data](#) ↗.

4. A junior data analyst uses a spreadsheet tool to create a visualization that groups and counts shipping data by carrier, route, and trip length. What tool are they using?

1 / 1 point

- ☐ Format
- ☐ Data validation
- ☐ Sort
- ☒ Pivot table

✔ Correct

5. Company leaders at a cafeteria supplier want to improve business performance. How could they use metrics and a metric goal to help them do so?

1 / 1 point

- ☐ Set a metric as the business objective. Then, quantify it using numerous data points.
- ☒ Create a metric goal as the business objective. Then, evaluate it using metrics.
- ☐ Develop a metric. Then, evaluate it to determine whether it advances performance.
- ☐ Establish a metric goal as a single data point. Then, quantify it with metrics.

✔ Correct

6. Which of the following statements correctly describe dashboards and reports? Select all that apply.

1 / 1 point

- ☒ A sales dashboard could be used to track daily e-commerce sales.

✔ Correct

- ☒ Dashboards are useful for data visualization.

✔ Correct

- ☐ Reports provide continual access to information.

- ☒ A report is a static collection of data given to stakeholders periodically.

✔ Correct

7. Fill in the blank: A company determines the _____ of an investment using ROI, which is calculated by comparing the two metrics of investment cost and profit.

1 / 1 point

- ☐ difficulty
- ☒ success
- ☐ urgency
- ☐ expense

✔ Correct

8. What are some typical challenges that may be faced by businesses that are beginning to collect and use big data? Select all that apply.

1 / 1 point

- ☒ Technology may not provide measurable data

✔ Correct

- ☒ Having too much irrelevant information

✔ Correct

- ☒ Slower decision-making time frames

✔ Correct

- ☐ Large datasets cannot cover a long time period

6. Which of the following statements correctly describe dashboards and reports? Select all that apply.

0.5 / 1 point

- ☒ Dashboards are designed and distributed periodically as a reference.

✘ This should not be selected
Review [the video about sharing findings](#).

- ☒ Reports are effective at capturing high-level, historical data.

✔ Correct

- ☒ Reports and dashboards are both useful for data visualization.

✔ Correct

- ☐ A dashboard could be used to track hourly error rates when programming code.

7. Fill in the blank: A company determines the success of an investment using _____, which is calculated by comparing the two metrics of investment cost and profit.

1 / 1 point

- ☐ rating of investment
- ☐ reasoning on investment
- ☐ retention of investment
- ☒ return on investment

✔ Correct

8. What are some typical challenges that may be faced by businesses that are beginning to collect and use big data? Select all that apply.

1 / 1 point

- ☐ Inappropriate for use by large organizations
- ☒ Needed data may be inaccessible

✔ Correct

- ☒ Technology may not provide reportable data

✔ Correct

- ☒ Having too much unimportant information

✔ Correct
