

Creating a scope of work

Creating a scope of work

Categorization exercise

Organize a project into a structured scope of work

As a data analyst, it's important to understand scope of work (SOW). In this exercise, you'll organize a staff training event at a company to learn more about SOW.

You're done!

A scope of work keeps everyone on the same page. Using structured thinking, you can define what is being delivered, when, and how you will measure success along the way.
