

Test your knowledge on data types, fields, and values

1. Fill in the blank: A data type is a specific kind of data _____ that tells what kind of value the data is.

1 / 1 point

- ☐ point
- ☐ frame
- ☐ model
- ☒ attribute

✓ **Correct**

A data type is a specific kind of data attribute that tells what kind of value the data is.

2. What are the key characteristics of a text, or string, data type? Select all that apply.

1 / 1 point

- ☐ Has numerical percentages
- ☒ Contains textual information

✓ **Correct**

Text, or string, data types are sequences of characters and punctuation that contain textual information.

- ☐ Only two possible values
- ☒ Sequence of characters and punctuation

✓ **Correct**

Text, or string, data types are sequences of characters and punctuation that contain textual information.

3. In a data table, where are fields contained?

1 / 1 point

- ☐ Rows
- ☒ Columns
- ☐ Charts
- ☐ Favorites

✓ **Correct**

In a data table, the columns are fields, and the rows are records.

4. When using long data, each subject has data in multiple rows. This is because each row represents what?

1 / 1 point

- ☐ Multiple values
- ☐ True or false data points
- ☒ One observation per subject
- ☐ Data in different formats

✓ **Correct**

When using long data, each subject has data in multiple rows. This is because each row represents one observation point per subject.
