

Glossary terms from module 1

Terms and definitions for Course 3, Module 1

Agenda: A list of scheduled appointments

Audio file: Digitized audio storage usually in an MP3, AAC, or other compressed format

Boolean data: A data type with only two possible values, usually true or false

Continuous data: Data that is measured and can have almost any numeric value

Cookie: A small file stored on a computer that contains information about its users

Data element: A piece of information in a dataset

Data model: A tool for organizing data elements and how they relate to one another

Digital photo: An electronic or computer-based image usually in BMP or JPG format

Discrete data: Data that is counted and has a limited number of values

External data: Data that lives, and is generated, outside of an organization

Field: A single piece of information from a row or column of a spreadsheet; in a data table, typically a column in the table

First-party data: Data collected by an individual or group using their own resources

Long data: A dataset in which each row is one time point per subject, so each subject has data in multiple rows

Nominal data: A type of qualitative data that is categorized without a set order

Ordinal data: Qualitative data with a set order or scale

Ownership: The aspect of data ethics that presumes individuals own the raw data they provide and have primary control over its usage, processing, and sharing

Pixel: In digital imaging, a small area of illumination on a display screen that, when combined with other adjacent areas, forms a digital image

Population: In data analytics, all possible data values in a dataset

Record: A collection of related data in a data table, usually synonymous with row

Sample: In data analytics, a segment of a population that is representative of the entire population

Second-party data: Data collected by a group directly from its audience and then sold

Social media: Websites and applications through which users create and share content or participate in social networking

String data type: A sequence of characters and punctuation that contains textual information (Refer to Text data type)

Structured data: Data organized in a certain format such as rows and columns

Text data type: A sequence of characters and punctuation that contains textual information (also called string data type)

United States Census Bureau: An agency in the U.S. Department of Commerce that serves as the nation's leading provider of quality data about its people and economy

Unstructured data: Data that is not organized in any easily identifiable manner

Video file: A collection of images, audio files, and other data usually encoded in a compressed format such as MP4, MV4, MOV, AVI, or FLV

Wide data: A dataset in which every data subject has a single row with multiple columns to hold the values of various attributes of the subject
