

Test your knowledge on data credibility

1. Fill in the blank: Data is considered _____ when it is accurate, complete, and unbiased information that has been vetted and proven fit for use.

1 / 1 point

- ☒ reliable
☐ original
☐ current
☐ comprehensive

✓ **Correct**

Data is considered reliable when it is accurate, complete, and unbiased information that has been vetted and proven fit for use.

2. Which of the following are usually good data sources? Select all that apply.

1 / 1 point

- ☒ Vetted public datasets

✓ **Correct**

Vetted public datasets, academic papers, and governmental agency data are usually good data sources.

- ☒ Academic papers

✓ **Correct**

Vetted public datasets, academic papers, and governmental agency data are usually good data sources.

- ☒ Governmental agency data

✓ **Correct**

Vetted public datasets, academic papers, and governmental agency data are usually good data sources.

- ☐ Social media sites

3. To determine if a data source is cited, ask which of the following questions? Select all that apply.

1 / 1 point

☐ Has this dataset been properly cleaned?

☒ When was this data last refreshed?

✔ **Correct**

To determine if a data source is cited, ask three questions: Is this dataset from a credible organization? Who created this dataset? And when was this data last refreshed?

☒ Who created this dataset?

✔ **Correct**

To determine if a data source is cited, ask three questions: Is this dataset from a credible organization? Who created this dataset? And when was this data last refreshed?

☒ Is this dataset from a credible organization?

✔ **Correct**

To determine if a data source is cited, ask three questions: Is this dataset from a credible organization? Who created this dataset? And when was this data last refreshed?

4. A junior data analyst learns that the dataset they have been given is six years old. After looking into this further, they also discover that the age of the data is making the information irrelevant to their project. What good data source principle have they used to evaluate the dataset?

1 / 1 point

☐ Original

☐ Reliable

☒ Current

☐ Comprehensive

✔ **Correct**

They have considered whether the data is current. Current data is timely and relevant.
