

Module 2 challenge

1. An individual declines to give consent for a company to use their data. Later, they learn that the company used their data without permission. Which element of their data privacy has been violated?

1 point

- ☐ The right to inspect, update, or correct their own data
- ☐ Ability to give consent to use their data
- ☒ Protection from unauthorized access to their private data
- ☐ Freedom from inappropriate use of their data

✗ **Incorrect**

Review [the video about aspects of data privacy](#).

Answer: Protection from inappropriate use of their data

2. A data professional working on a project about commuters researches the origin of a dataset and confirms it was created by a government transportation agency which is a reputable source. However, they also find it was last updated seven years ago. Which aspect of good data are they missing?

1 / 1 point

- ☒ Current
- ☐ Original
- ☐ Reliable
- ☐ Cited

✓ Correct

3. A hospital system wants to protect the personally identifiable information of its patients, such as names and medical records. They ask their data team to anonymize the data. What techniques might they use to achieve this goal? Select all that apply.

1 / 1 point

- ☒ Hashing

✓ Correct

- ☐ Sorting

- ☒ Masking

✓ Correct

- ☒ Blanking

✓ Correct

4. An investor with a background of working and investing in the tech industry interprets any pitch from a tech startup as being more promising than others, even if the information is confusing and unclear. What type of bias does this scenario describe?

1 / 1 point

- ☐ Interpretation
- ☐ Sampling
- ☐ Observer
- ☒ Confirmation

✓ Correct

5. Before completing a survey, a respondent learns more about how their data will be used. They understand why their data is being collected and how long it will be stored. What data ethics concept does this describe?

1 / 1 point

- ☐ Privacy
- ☒ Consent
- ☐ Credibility
- ☐ Anonymization

✓ Correct

6. A university surveys its student-athletes about their experience in college sports. The survey only includes student-athletes with scholarships. What type of bias does this scenario describe?

1 / 1 point

- ☐ Confirmation
- ☒ Sampling
- ☐ Interpretation
- ☐ Observer

✓ Correct

7. Fill in the blank: The data ethics principle of _____ states that an individual has the right to understand all of the data-processing activities and algorithms used on their data.

1 / 1 point

- ☒ transaction transparency
- ☐ currency
- ☐ ownership
- ☐ consent

✓ Correct

8. A city has a database that contains data about air quality, which any business, nonprofit, or citizen can access, reuse, or redistribute. What type of data is described in this scenario?

1 / 1 point

- ☐ Allowable
- ☐ Closed
- ☐ Free
- ☒ Open

✓ Correct

9. A visitor to a company's website is asked to provide consent for the company to use their data. The visitor wants to know how their data will be used and for how long it will be stored. Which aspect of data ethics are they curious about?

1 / 1 point

- ☒ Consent
- ☐ Transaction transparency
- ☐ Privacy
- ☐ Currency

✓ Correct

10. Data anonymization is a common practice used to protect sensitive information. Which of the following types of data should always be anonymized before analysis?

1 point

- ☐ Customer purchase history with categories.
- ☒ Website data without usernames.
- ☐ Social security numbers and medical records
- ☐ Hair color and age of participants.

✗ Incorrect

Review [this reading on data anonymization](#). ↗

Answer: Social numbers and medical stores

10. Data anonymization aims to protect privacy by removing sensitive information. Which of the following best describes a technique used in data anonymization?

1 / 1 point

- ☐ Allowing public access to anonymized datasets while keeping the original data secure.
- ☒ Using a de-identification technique like replacing a person's name with a random alphanumeric code.
- ☐ Storing all data in its original format but requiring high levels of user authorization for access.
- ☐ Merging all data sets into a single, large database for easier analysis.

✓ Correct

1. An individual logs into their bank account and notices that their phone number is incorrect. They contact the bank to update their phone number. Which element of data privacy are they using?

1 / 1 point

- ☐ Protection from unauthorized access to their private data
- ☒ The right to inspect, update, or correct their own data
- ☐ Freedom from inappropriate use of their data
- ☐ Ability to give consent to use their data

✓ Correct
