Managing your files

Categorization exercise

Effective naming and organization methods

Review your knowledge of effective file naming and file organization practices.

Is this a good file name?

Categorize each file name by dragging it to the appropriate area. Or use the plus sign to choose where it belongs.

You've categorized everything.

Best practice

Q421data-final-FINAL-LP-JD-AP-AP2

Is this a good file organization practice?

Categorize each file organization practice by dragging it to the appropriate area. Or use the plus sign to choose where it belongs.

You've categorized everything.

Best practice

Back up files often to avoid losing work.

Most files can fit in your hierarchy if you've done a good job of mapping it out.

Keep ongoing work separate from completed work.

Create folders and subfolders hierarchically so that related files are stored together.

Needs improvement

Keep all current and completed work in one primary folder.

Avoid resaving your files as this can be unnecessary. Saving your files once is enough.

Save files locally on your desktop so you can find them easily.

Keep your files in only one place.

Create a new folder every time you add a file to the project
