

Test your knowledge on bringing data to order

1. Fill in the blank: Naming _____ are consistent guidelines used to describe the content, date, or version of a file.

1 / 1 point

- ☒ conventions
- ☐ attributes
- ☐ descriptors
- ☐ references

✓ **Correct**

Naming conventions are guidelines that describe the content, date, or version of a file.

2. What are the key goals of foldering in data analytics? Select all that apply.

1 / 1 point

- ☐ Assign metadata about the folders
- ☐ Transfer files from one place to another
- ☒ Keep project-related files together

✓ **Correct**

The key goals of foldering include keeping project-related files together and organizing them into subfolders.

- ☒ Organize files into subfolders

✓ **Correct**

The key goals of foldering include keeping project-related files together and organizing them into subfolders.

3. What is the process of structuring folders broadly at the top, then breaking down those folders into more specific topics?

1 / 1 point

- ☒ Creating a hierarchy
- ☐ Producing a backup
- ☐ Developing metadata
- ☐ Assigning naming conventions

✓ **Correct**

The process of structuring folders broadly at the top, then breaking down those folders into more specific topics, is creating a hierarchy.

4. Which of the following examples would be the most effective file name?

1 / 1 point

- ☐ Data_519
- ☐ CampaignData_03
- ☐ May30-2019_AirportAdCampaignResults_Terminals3-5_InclCustSurveyResponses_Ideas
- ☒ AirportCampaign_2013_10_09_V01

✓ **Correct**

AirportCampaign_2013_10_09_V01 is an effective file name because it is an appropriate length and it references the project name, creation date, and version.
