

Test your knowledge on data integrity and analytics objectives

1. Fill in the blank: Data _____ involves the accuracy, completeness, consistency, and trustworthiness of data throughout its lifecycle.

1 / 1 point

- ☒ integrity
- ☐ manipulation
- ☐ transferral
- ☐ replication

✓ **Correct**

Data integrity involves the accuracy, completeness, consistency, and trustworthiness of data throughout its lifecycle.

2. Which process do data analysts use to make data more organized and easier to read?

1 / 1 point

- ☒ Data manipulation
- ☐ Data uniformity
- ☐ Data replication
- ☐ Data transfer

✓ **Correct**

To make data more organized and easier to read, data analysts use data manipulation.

3. Before analysis, a company collects data from countries that use different date formats. Which of the following actions would improve the data integrity?

1 / 1 point

- ☐ Leave the dates in their current formats
- ☒ Change all of the dates to the same format
- ☐ Organize the data by country
- ☐ Remove data in an unfamiliar date format

✓ **Correct**

Changing all of the dates to the same format would improve the data integrity.

4. In this spreadsheet, what common data problem appears in rows 2 and 7 ?

1 / 1 point

	First	Last	CustID
1	Douglas	Pool	10794
2	Ronnie	Mazlan	10351
3	Tonya	Butcher	10990
4	Yanni	Morningside	10184
5	Eliza	Fe	10212
6	Travis	Tatien	10746
7	Ronnie	Mazlan	10351

- ☐ System failure
- ☐ Insufficient data
- ☒ Duplicate data
- ☐ Data virus

✔ Correct

Rows 2 and 7 contain duplicate data. This occurs when the same information appears in more than one row of a data table.
