

## Module 2 challenge

1. To identify ways to improve the shipping process, a data analyst merges a dataset of client order data with a dataset of shipping data. What should the data team do to ensure the compatibility of the two datasets?

1 / 1 point

- ☒ Map the data
- ☐ Use a visualization
- ☐ Spotcheck for null values
- ☐ Apply a data structure

✓ Correct

2. Fill in the blank: When typing a TRIM function, the correct \_\_\_\_\_ to follow is =TRIM(range).

1 / 1 point

- ☐ system
- ☐ algorithm
- ☒ syntax
- ☐ validation

✓ Correct

3. In this spreadsheet, which function will extract Clay Casey's four-digit postcode?

1 point

|   | A             | B                             | C         | D         |
|---|---------------|-------------------------------|-----------|-----------|
| 1 | Customer      | Street                        | Territory | Country   |
| 2 | Terry Stewart | 707 Collins St, Docklands     | VIC 3008  | Australia |
| 3 | Che Price     | 177 William St, Tennant Creek | NT 0860   | Australia |
| 4 | Stanley Moss  | 430 Little Collins St,        | CXI 6798  | Australia |
| 5 | Clay Casey    | 250 Queen St, Sydney          | NSW 3000  | Australia |

- ☒ =LEFT(C5,4)
- ☐ =RIGHT(C5,4)
- ☐ =LEFT(4,C5)
- ☐ =RIGHT(4,C5)

✗ Incorrect

Review [the section on data cleaning with functions](#).

4. Fill in the blank: When searching for the value in the first argument of the function, VLOOKUP looks in the \_\_\_\_\_ column of the specified location.

1 / 1 point

- ☐ rightmost
- ☒ leftmost
- ☐ false
- ☐ true

✓ Correct

5. In the following spreadsheet, a data professional wants to create product IDs in Column C. The IDs should include the product name from Column A and its version number from Column B. Which function will create the ID **Tether\_rope02**?

1 / 1 point

|   | A            | B              | C  |
|---|--------------|----------------|----|
| 1 | Product name | Version number | ID |
| 2 | Raft         | 05             |    |
| 3 | Oar          | 01             |    |
| 4 | Life_vest    | 04             |    |
| 5 | Tether_rope  | 02             |    |

- ☐ =CONCATENATE(A5\*B5)
- ☐ =CONCATENATE(A5+B5)
- ☐ =CONCATENATE(B5, A5)
- ☒ =CONCATENATE(A5,B5)

✓ Correct

6. A data analyst wants to know how many cells from E2 through cell E100 contain numbers below 299. Which of the following COUNTIF statements should they use?

1 / 1 point

- ☐ =COUNTIF(E2:E100,">=299")
- ☐ =COUNTIF(E2:E100,"<=299")
- ☒ =COUNTIF(E2:E100,"<299")

✓ Correct

- ☐ =COUNTIF(E2:E100,">299")

7. A data analyst uses a spreadsheet's Split tool to place each vegetable and fruit into new, separate cells. What is the comma's function in this scenario?

1 / 1 point

|   | A                              | B                       |
|---|--------------------------------|-------------------------|
| 1 | <b>Vegetables</b>              | <b>Fruits</b>           |
| 2 | Carrot, Celery                 | Strawberry, Grape       |
| 3 | Broccoli, Cauliflower, Spinach | Coconut, Banana, Orange |
| 4 | Zucchini                       | Pear, Blackberry        |

- ☐ String
- ☐ Duplicate
- ☒ Delimiter

✔ Correct

- ☐ Substring

8. A data analyst suspects that there are some nulls in their spreadsheet. In order to identify those missing values, they use a spreadsheet tool that changes how cells appear when values meet specific conditions. What tool do they use?

1 / 1 point

- ☒ Conditional formatting
- ☐ Cell filtering
- ☐ Data merging
- ☐ Field length

✔ Correct

9. The owner of a local landscaping business just acquired the customers from another landscaping business where the owner retired. Both owners had created their own databases containing customer information, including names, phone numbers, and services requested. The new owner wants to combine this customer data into a single, unified database so that they have everything in one place. However, there might be duplicates like customers who used both services and inconsistencies like differences in how names or phone numbers are entered in the data. What is the most important step to take before the new owner starts analyzing customer data for marketing campaigns?

1 / 1 point

- ☐ Develop targeted marketing campaigns for the new customer base.
- ☐ Design attractive visualizations for presenting the combined data.
- ☐ Use VLOOKUP to merge the customer email addresses.
- ☒ Data mapping to standardize, merge, and clean the data from both databases.

✓ Correct

10. A sales manager is reviewing the monthly sales report with their team. The report shows a significant increase in sales volume – the company made twice as many sales compared to the previous month. However, the total profit for the month has actually decreased. What could be the explanation for this contradictory situation? Select all that apply.

0.8 / 1 point

- ☒ Profit values may be missing from the data.

✓ Correct

- ☒ There might be errors in the data entry for sales figures.

✓ Correct

- ☒ The original sales data was not backed up properly.

✗ This should not be selected  
Review [the reading on data-cleaning pitfalls](#). [↗](#)

- ☐ Extra data skewed the results.
