

Test your knowledge on data cleaning

1. Which data professionals are most often responsible for ensuring that data is available, secure, and backed up to prevent loss?

1 / 1 point

- ☐ Data scientists
- ☐ Data analysts
- ☒ Data warehousing specialists
- ☐ Data engineers

✓ **Correct**

Data warehousing specialists make sure that data is available, secure, and backed up to prevent loss. They do this by developing processes and procedures to effectively store and organize data.

2. Fill in the blank: If a dataset contains _____, this is an indication that those values do not exist in the dataset.

1 / 1 point

- ☐ outliers
- ☐ anomalies
- ☐ zeroes
- ☒ nulls

✓ **Correct**

If a dataset contains nulls, this is an indication that those values do not exist in the dataset.

3. A data professional works in a spreadsheet column that can only contain six-digit customer ID numbers. They ensure the data points in the column are always exactly six-digits long using which data analytics tool?

1 / 1 point

- ☐ Labels
- ☒ Field length
- ☐ Data formatting
- ☐ Filtering

✓ **Correct**

They ensure the values in the column are always exactly six-digits long using field length. Field length determines how many characters can be keyed into a spreadsheet field.

4. Fill in the blank: Data validation is a tool for checking the _____ of data before adding or importing it.

1 / 1 point

- ☐ accessibility and openness
- ☐ size and structure
- ☒ accuracy and quality
- ☐ origin and age

✓ **Correct**

Data validation is a tool for checking the accuracy and quality of data before adding or importing it.
