

Helpful resources and tips

As a learner, you can choose to complete one or multiple courses in the Google Data Analytics Certificate program. However, to obtain the certificate, you must complete all eight courses in the program and submit all graded assignments. This reading describes what is required to obtain a certificate, as well as best practices for you to have a successful learning experience on Coursera.

Course completion to obtain a certificate

To receive your official Google Data Analytics Certificate, you must:

- Pass all graded assignments in all 9 courses of the certificate program. Each graded assignment is part of a cumulative graded score for the course, and the passing grade for each course is 80%.

AND one of the following:

- Pay the [course certificate fee](#),
- Be approved for [Coursera Financial Aid](#), or
- Complete the certificate through an educational institution, employer, or agency that's sponsoring your participation.

Evaluate your current data analytics skills

If you're a learner who has some experience with data analytics, you may wish to bypass this certificate program and proceed directly to a more advanced program such as the Google Advanced Data Analytics Certificate or the Google Business Intelligence Certificate. Determine whether you're ready for one of these programs in an upcoming reading, [Evaluate your current data analytics skills](#).

Healthy habits for successfully completing the certificate

Here are some best practices to help you successfully complete the courses in the program:

- Plan your time: Setting regular study times and following them each week helps make learning a part of your routine. Use a calendar or timetable to create a schedule, and list what you plan to do each day in order to set achievable goals. Find a space that allows you to focus.
- Work at your own pace: Everyone learns differently, so this program has been designed to let you work at your own pace. Although your personalized deadlines start when you enroll, feel free to progress through the program at the speed that works best for you. There is no penalty for late assignments; to earn your certificate, all you have to do is complete all of the work. If you miss two assessment deadlines in a row, or if you miss an assessment deadline by two weeks, you'll see a Reset deadlines option on the Grades page. Click it to switch to a new course schedule with updated deadlines. You can use this option as many times as you need.
- Be curious: If you find an idea that gets you excited, act on it! Enrich your learning experience with Gemini's [Guided Learning feature](#). It acts as your personal learning assistant, helping you ask insightful questions, find more details online, and explore interesting topics. The steps you take to support your learning will advance your knowledge, create more opportunities for you in this high-growth field, and help you qualify for jobs.
- Follow along with instructors: Each instructional video with an onscreen software or programming demonstration has a corresponding step-by-step guide. This guide is a reading that outlines each step an instructor performs in the video. You'll also find additional information in the guide that explains the purpose of the concepts covered, why a step is done a certain way, and tips for using the tool.
- Take notes: Notes will help you remember information in the future, especially as you're preparing to enter a new job field. In addition, taking notes is an effective way to make connections between topics and gain a better understanding of those topics.

- Review exemplars: Exemplars are completed assignments that fully meet an activity's criteria; many activities in this program have exemplars that you can compare to your own work. Although there are often many different ways to complete an assignment, exemplars offer you guidance and inspiration about how to complete the activity.
- Build your career identity: Your career identity is the unique value you bring to the workforce. [Watch this video](#) to learn about the key components of career identity and write your own career identity statement. Discovering and defining your own career identity makes you better equipped to choose a career path that aligns with your strengths, values, and goals and is more effective in your chosen profession.
- Connect with other learners: If you have a question, chances are, you're not alone. Reach out in the discussion forum to ask for help from other learners in this program. You can also visit Coursera's private [Google Data Analytics Community](#) to expand your network, discuss career journeys, and share experiences. Check out the [quick start guide](#).
- Update your profile: [Update your profile](#) on Coursera to include your photo, career goals, and more. When other learners find you in the discussion forums, they can click on your name to access your profile and get to know you better.

Documents and files for course activities

To complete certain activities in the program, you will need to use digital documents, spreadsheets, presentations, and/or labs. Data analytics professionals use these software tools to collaborate within their teams and organizations. If you need more information about using a particular type of document, refer to these resources:

- [Microsoft Word: Help and learning](#): Microsoft Support page for Word
- [Google Docs](#): Help Center page for Google Docs
- [Microsoft Excel: Help and learning](#): Microsoft Support page for Excel
- [Google Sheets](#): Help Center page for Google Sheets
- [Microsoft PowerPoint: Help and learning](#): Microsoft Support page for PowerPoint

- [How to use Google Slides](#): Help Center page for Google Slides

Module, course, and certificate glossaries

This program covers a lot of terms and concepts, some of which you may already know and some of which may be unfamiliar to you. To review terms and help you prepare for graded quizzes, refer to the following glossaries:

- Module glossaries: At the end of each module's content, you can review a glossary of terms from that module. The module glossaries are not downloadable; however, all of the terms and definitions are included in the course and certificate glossaries, which are downloadable.
- Course glossaries: At the end of each course, you can access and download a glossary that covers all of the terms in that course.
- Certificate glossary: The certificate glossary includes all of the terms in the entire certificate program and is a helpful resource that you can reference throughout the program or at any time in the future.

Find the course and certificate glossaries using the course's Resources tab. Access and download the certificate glossaries, then save them on your computer. To access the Data Analytics Certificate program glossary, click the following link and select Use Template.

Link to the glossary: [Google Data Analytics Certificate glossary](#)

OR

If you don't have a Google account, download the glossary directly from the following attachment.

Course feedback

Providing feedback on videos, readings, and other materials is easy. With the resource open in your browser, locate the thumbs-up and thumbs-down symbols.

- Click thumbs-up for materials that are helpful.
- Click thumbs-down for materials that are not helpful.

If you want to flag a specific issue with an item, click the flag icon, select a category, and enter an explanation in the text box. This feedback goes to the course development team and isn't visible to other learners. All feedback received helps to create even better certificate programs in the future.

For technical help on the Coursera platform, visit the [Learner Help Center](#).
