

Module 2 challenge

1. Fill in the blank: A junior data analyst at a healthcare organization uses the spreadsheet _____ function to locate specific characters from insurance provider account numbers.

1 / 1 point

- ☐ WHERE
- ☒ FIND
- ☐ FROM
- ☐ IDENTIFY

✓ Correct

2. A data analyst works with a spreadsheet containing product information that often has very long text strings. To check for consistency, they use a function to count the number of characters in cell P12. What is the correct syntax of the function?

1 / 1 point

- ☐ =LEN (P : 12)
- ☐ =LEN (P : P12)
- ☒ =LEN (P12)
- ☐ =LEN (P , 12)

✓ Correct

3. You use a spreadsheet to organize a list of upcoming tasks at work. Column A contains the list of tasks, and column B notes their priority: high, medium, or low. What spreadsheet tool will create a drop-down list of the priorities in column B?

1 / 1 point

- ☐ Find
- ☐ Pop-up menus
- ☐ Conditional formatting
- ☒ Data validation

✓ Correct

4. An analyst at a weather station is analyzing data to understand how cloud cover affects temperature in their area. Currently, they have data on temperature in Celsius, but they want to convert this data to Fahrenheit. Which formula should they use to convert a Celsius value in cell G5 to Fahrenheit in another cell?

1 / 1 point

- ☐ =CONVERT (G5, "F", "C")
- ☒ =CONVERT (G5, "C", "F")
- ☐ =CONVERT ("F", "C", G5)
- ☐ =CONVERT ("C", "F", G5)

✓ Correct

5. You use a SQL database to evaluate rideshare efficiency. The database table contains one column of pick-up locations and another column of drop-off locations. What function will combine the pick-up and drop-off locations into a new column?

1 / 1 point

- ☐ GROUP
- ☒ CONCAT
- ☐ COMBINE
- ☐ JOIN

✓ Correct

6. A data analyst in human resources uses a spreadsheet to track employee work anniversaries. What spreadsheet tool can they use to add color to the cells containing the name of any employee who has worked for the business for at least five years?

1 / 1 point

- ☒ Conditional formatting
- ☐ Add color
- ☐ CONVERT
- ☐ Data validation

✓ Correct

7. Fill in the blank: A data analyst analyzing the boiling points of various liquids uses the SQL function _____ to adjust 356.727801 °C to just three decimal places.

1 / 1 point

- ☐ TRUNCATE
- ☒ ROUND
- ☐ SHORTEN
- ☐ DECIMAL

✓ Correct

8. Spreadsheet cell H9 contains the text string **Tableau**. To return the substring **Tab**, what is the correct syntax?

1 / 1 point

- ☐ `=LEFT(3, H9)`
- ☒ `=LEFT(H9, 3)`
- ☐ `=RIGHT(3, H9)`
- ☐ `=RIGHT(H9, 3)`

✓ Correct
