

Test your knowledge on pivot tables

1. Fill in the blank: The _____ of a pivot table organize and group the selected data horizontally.

1 / 1 point

- ☐ columns
- ☐ values
- ☐ filters
- ☒ rows

✓ **Correct**

The rows of a pivot table organize and group the selected data horizontally.

2. What is the purpose of this pivot table?

1 / 1 point

Route	Mileage
10	799
15	778
12	234
21	412
9	900
2	505
22	112
13	607
7	199
4	299
11	808
20	190
Total	5843

- ☐ Sort the routes by greatest to least mileage
- ☒ Sum the mileage totals for each individual route
- ☐ Filter routes by mileage type
- ☐ Find the average mileage total for each route

✓ **Correct**

The purpose of the pivot table is to sum the individual mileage totals for each route. It also shows a grand total of the mileage for all routes added together.

3. How could this pivot table be adjusted to show the same data, but only for routes categorized as West Coast?

1 / 1 point

Route	Mileage
10	799
15	778
12	234
21	412
9	900
2	505
22	112
13	607
7	199
4	299
11	808
20	190
Total	5843

- ☒ Add a filter to show only routes located in the West Coast
- ☐ Sort the current row by route location
- ☐ Summarize the values by route location
- ☐ Add a new column labeled West Coast Locations

✓ **Correct**

To show the same data, but only for products categorized as West Coast, add a filter to show only West Coast routes.

4. Which spreadsheet tool finds an average value using values generated within a pivot table?

1 / 1 point

- ☒ Calculated field
- ☐ Data validation
- ☐ Conditional formatting
- ☐ Filter

✓ **Correct**

A calculated field finds an average value using values generated within a pivot table. It is a new field within a pivot table that carries out certain calculations based on the values of other fields.
