

Congratulations! Course wrap-up

You completed another course. Congrats! We still got some more to learn, but you can always go back and review what you've covered already. Coming up, you'll meet my colleague Kevin. Kevin can't wait to show you everything the next part of the program has to offer. And now that you're familiar with lots of different ways to analyze data, you'll be ready to share your analysis results through visualizations and reports. Up next, we'll focus on helping you develop your data visualization skills with tools, like Tableau, that'll help you get your visualizations looking great.

You'll also learn how sharing your data is really about telling the story of your data and how it answers the questions that prompted your analysis. Finally, you'll learn what it takes to make an effective presentation and how to manage and respond to the questions. Thanks so much for joining me in exploring the world of data analytics. You've made it this far, so be proud and keep it up as you move to the next course.
