

Module 2 challenge

1st Attempt:

1. A data analyst is in the middle of designing a visualization in Tableau Public. As it is a work in progress, they want to keep the visualization private from other users until it is complete. Which icon should they observe to determine whether or not their work is hidden?

1 / 1 point

- ☐ Source
- ☐ Private
- ☒ Eye
- ☐ Lock

✓ Correct

2. A data team uses Tableau to create a line chart of financial data, with the ability to filter by company, industry, and time period. This enables financial analysts to view how companies are performing relative to their peers and the overall market. What type of visualization are they using?

1 / 1 point

- ☐ Static
- ☐ Infographic
- ☐ Public
- ☒ Interactive

✓ Correct

3. Fill in the blank: In Tableau, a _____ palette is a color theme that displays two ranges of data values using two different hues, with color intensity representing the magnitude of the values.

1 / 1 point

- ☐ overlaid
- ☐ contrasting
- ☒ diverging
- ☐ inverted

✓ Correct

4. While designing a bar chart in Tableau, you use a color scheme with high contrast between the bars to ensure they are easy to distinguish for people with color vision deficiencies. What does it mean to have contrast?

1 / 1 point

- ☐ The color scheme is uniform
- ☐ The color scheme is aesthetically pleasing
- ☐ The color scheme is monotone
- ☒ The color scheme uses a range of different colors

✓ Correct

5. An analyst works with Tableau to analyze highway traffic data. They select specific time routes in the southeastern United States, then analyze the traffic patterns in those states. What tool do they use to select this region?

1 / 1 point

- ☐ Radial
- ☐ Rectangular
- ☐ Pan
- ☒ Lasso

✓ Correct

6. You use Tableau for an analysis project about cheese-tasting preferences. You drag the Cheese Type field onto a shelf, selecting the specific cheese type cheddar. This enables you to visualize a subset of the data that is relevant to your analysis. What menu are you using in this scenario?

1 point

- ☐ Filters
- ☐ Attributes
- ☐ Formats
- ☒ Dimensions

✗ Incorrect

Review [the video about Tableau basics](#).

7. Fill in the blank: A data professional uses Tableau's _____ tool to horizontally and vertically shift their perspective of a scatter plot in order to compare customers who have made a high number of purchases.

1 point

- ☐ pan
- ☐ lasso
- ☒ rectangular
- ☐ radial

✗ Incorrect

Review [the video about Tableau basics](#).

8. Which of the following statements accurately describe key design principles for creating data visualizations? Select all that apply.

0.5 / 1 point

☒ A key color principle is using color consciously and meaningfully.

✓ Correct

☐ Optimizing the number of elements might include choosing to plot fewer lines.

☒ Using orientation effectively requires being considerate of what colors mean to different people.

✗ This should not be selected

Review [the reading about effective data visualizations](#).

☒ Choosing the right visual involves considering which graphic will be most effective for your audience.

✓ Correct

9. Which type of data is best suited for visualization using a line chart?

1 / 1 point

- ☐ Categorical data
- ☒ Continuous data over time
- ☐ Data points without a specific order
- ☐ Proportional data representing parts of a whole

✓ Correct

10. Data from which of the following scenarios is best suited for visualization using a histogram?

1 point

- ☒ Customer satisfaction ratings across different product categories
- ☐ Distribution of test scores
- ☐ Budget allocation by category
- ☐ Sales growth over the last year

✗ Incorrect

2nd Attempt:

1. A data analyst is in the middle of designing a visualization in Tableau Public. As it is a work in progress, they want to keep the visualization private from other users until it is complete. Which icon should they observe to determine whether or not their work is hidden?

1 / 1 point

- ☒ Eye
- ☐ Source
- ☐ Lock
- ☐ Private

✓ Correct

2. A data team uses Tableau to create a line chart of financial data, with the ability to filter by company, industry, and time period. This enables financial analysts to view how companies are performing relative to their peers and the overall market. What type of visualization are they using?

1 / 1 point

- ☒ Interactive
- ☐ Infographic
- ☐ Public
- ☐ Static

✓ Correct

3. Fill in the blank: A diverging palette is a color theme that displays two ranges of data values using two different hues, with color _____ representing the magnitude of the values.

1 / 1 point

- ☐ markers
- ☒ intensity
- ☐ overlays
- ☐ borders

✓ Correct

4. While designing a pie chart in Tableau, you use a color scheme with high contrast among the different pie segments to ensure they are easy to distinguish for people with color vision deficiencies. What does it mean to have contrast?

1 / 1 point

- ☒ The color scheme uses a range of different colors
- ☐ The color scheme is monotone
- ☐ The color scheme is uniform
- ☐ The color scheme is aesthetically pleasing

✓ Correct

5. An analyst works with Tableau to analyze sales data for a retail company with stores across the United States. They want to select data from states that are located on the West Coast. What tool do they use to select these data points?

1 / 1 point

- ☐ Radial
- ☒ Lasso
- ☐ Rectangular
- ☐ Pan

✓ Correct

6. You use Tableau for a project about spacecraft trajectories. You drag the Spacecraft field onto a shelf, selecting a specific craft. This enables you to monitor the trajectories that will be most meaningful to your project. What menu are you using in this scenario?

1 / 1 point

- ☐ Formats
- ☐ Dimensions
- ☐ Attributes
- ☒ Filters

✓ Correct

7. Fill in the blank: A data professional uses Tableau's _____ tool to horizontally and vertically shift their perspective of a large map in order to better view the data about a specific smaller region.

1 / 1 point

- ☐ lasso
- ☒ pan
- ☐ rectangular
- ☐ radial

✔ Correct

8. Which of the following statements accurately describe key design principles for creating data visualizations? Select all that apply.

1 / 1 point

- ☒ Optimizing the data-ink ratio entails minimizing elements such as boxes around legends and use of shadows.

✔ Correct

- ☒ A key color principle is keeping color consistent throughout the visuals.

✔ Correct

- ☐ Using orientation effectively requires selecting inclusive color scales that make sense for everyone viewing them.

- ☒ Optimizing the number of elements might include using hue to emphasize important lines.

✔ Correct

9. Data from which of the following scenarios is best suited for visualization using a line chart? Select all that apply.

1 / 1 point

- ☒ Website traffic throughout the day

✔ Correct

- ☐ Proportion of different age groups in a population

- ☒ Sales figures for each month over the last year

✔ Correct

- ☐ Customer satisfaction ratings across different product categories

10. Data from which of the following scenarios is best suited for visualization using a histogram?

1 / 1 point

- ☐ Budget allocation by category
- ☐ Sales growth over the last year
- ☐ Customer satisfaction ratings across different product categories
- ☒ Distribution of test scores

✓ Correct
