

Understanding data storytelling

Understanding data storytelling
Categorization exercise

Identify the three steps of data storytelling

In this categorization exercise, you'll assign parts of data storytelling to their correct step.

Organize your scope of work

Categorize each element by dragging it to the appropriate part of your scope of work.

Or, use the plus sign to choose the appropriate answer.

Engage your audience	Create compelling visuals	Tell the story in an interesting narrative
Understand what internal stakeholders want from the project ✓	Visuals should be clear and able to stand on their own ✓	Provide recommendations at the end ✓
Seek to capture the audience's attention on an intellectual and emotional level ✓	Highlight the meaning behind the numbers at a glance ✓	Choose a primary message/spotlight ✓
Identify your audience ✓	Incorporate some interactive layered data so the curious can explore ✓	Clearly articulate recurring themes and data points ✓

You're done!

Data storytelling means engaging a specific audience with clear, compelling visuals.

Bring everything into focus with a single captivating narrative.
