

Test your knowledge on using Tableau dashboards

1. What are the key objectives of using a dashboard to organize information from multiple datasets into one central location? Select all that apply.

1 / 1 point

☒ Visualize data

✔ **Correct**

The key objectives of using a dashboard to organize information from multiple datasets into one central location include tracking, analyzing, and visualizing data.

☐ Protect data

☒ Analyze data

✔ **Correct**

The key objectives of using a dashboard to organize information from multiple datasets into one central location include tracking, analyzing, and visualizing data.

☒ Track data

✔ **Correct**

The key objectives of using a dashboard to organize information from multiple datasets into one central location include tracking, analyzing, and visualizing data.

2. Fill in the blank: Dashboard visuals should be _____, which means that they are balanced and make good use of space.

1 / 1 point

☐ interactive

☒ cohesive

☐ symmetrical

☐ informative

✔ **Correct**

Dashboard visuals must be cohesive, which means that they are balanced and make good use of space.

3. What type of layout should you choose if you want your Tableau dashboard to automatically resize itself based on the overall dashboard size?

1 / 1 point

- ☐ Filtered
- ☐ Summarized
- ☒ Tiled
- ☐ Floating

✔ **Correct**

If you want your Tableau dashboard to automatically resize itself based on the overall dashboard size, choose a tiled layout.

4. For what reasons might a data analyst choose to use filters when creating a dashboard view? Select all that apply.

1 / 1 point

- ☒ Zero in on what is important to stakeholders

✔ **Correct**

A data analyst might use filters to highlight individual data points or zero in on what is important to stakeholders.

- ☐ Remove outliers that don't conform to their hypothesis

- ☒ Highlight individual data points

✔ **Correct**

A data analyst might use filters to highlight individual data points or zero in on what is important to stakeholders.

- ☐ Put data in chronological order
