

Module 3 challenge

1st Attempt:

1. A junior data analyst at a manufacturing company analyzes product quality data to identify potential issues. While reviewing a scatterplot of product defect rate versus production batch, the analyst notices a data point far above the average defect rate. What should they do with this outlier?

1 / 1 point

- ☐ Hide it from the scatterplot
- ☐ Drop it from the scatterplot
- ☒ Determine whether it is an important observation
- ☐ Move it closer to the main trendline

✓ Correct

2. Fill in the blank: Charts, graphs, and other dashboard elements should be _____, which means they are balanced and make good use of available space.

0.5 / 1 point

☒ clean

✗ This should not be selected

Review [the video about telling a story with dashboards](#) ↗.

☐ constant

☒ complete

✗ This should not be selected

Review [the video about telling a story with dashboards](#) ↗.

☒ cohesive

✓ Correct

3. You are building a dashboard in Tableau. To create a design in which items can be layered over other objects, which layout should you choose?

1 / 1 point

- ☐ Itemized
- ☒ Floating
- ☐ Tiled
- ☐ Layered

✓ Correct

4. A data analyst wants to be able to edit a presentation visual directly. In addition, they do not want it to update automatically in other places. Which method should they use when adding the visual to their presentation?

1 point

- ☐ Copy and paste
- ☐ Embed
- ☐ Link
- ☒ Screenshot

✗ Incorrect

Review [the video about adding visuals to slideshows](#).

5. A data analyst at an e-commerce company uses data to identify which customers are most likely to make a purchase. The analyst shares this information with the marketing team in a report that uses data visualizations and storytelling techniques to make the findings clear and actionable. What aspect of data storytelling does this scenario describe?

1 point

- ☐ Takeaways
- ☒ Setting
- ☐ Spotlighting
- ☐ Narrative

✗ Incorrect

Review [the video about communicating about data analysis](#).

6. What Tableau tool can be used to limit the data displayed on a dashboard in order to save stakeholders time and effort?

1 / 1 point

- ☐ Pre-sizing
- ☐ Pre-sorting
- ☒ Pre-filtering
- ☐ Pre-building

✓ Correct

7. Which of the following statements correctly describe presentation best practices? Select all that apply.

1 / 1 point

- ☐ The setting depicts a challenge, an inefficient process, or a new opportunity.
- ☒ The plot creates tension in the current situation.

✔ Correct

- ☒ The aha moment involves sharing recommendations.

✔ Correct

- ☒ The big reveal highlights how data can be used to solve the problem.

✔ Correct

8. You prepare to communicate to clients about an analysis project. You consider how to connect with them and convince them to view the insights as you do. What aspect of data storytelling does this scenario describe?

1 / 1 point

- ☐ Theme
- ☐ Takeaways
- ☐ Discussion
- ☒ Engagement

✔ Correct

2nd Attempt:

1. A data professional working for a large retail chain analyzes customer purchase data to identify trends and patterns. While reviewing a scatterplot of purchase frequency versus amount, the analyst notices a cluster of data points far away from the main trendline. What should they do with this outlier?

1 / 1 point

- ☐ Drop it from the scatterplot
- ☐ Move it closer to the main trendline
- ☒ Determine whether it is an important observation
- ☐ Hide it from the scatterplot

✔ Correct

2. Fill in the blank: Charts, graphs, and other dashboard elements should be cohesive, which means they make good use of _____ and are balanced.

1 / 1 point

- ☐ labels and legends
- ☐ incoming data
- ☒ available space
- ☐ data filters

✓ Correct

3. You are building a dashboard in Tableau. To create a single-layer grid that contains no overlapping elements, which layout should you choose?

1 / 1 point

- ☐ Itemized
- ☐ Layered
- ☐ Floating
- ☒ Tiled

✓ Correct

4. A data analyst adds a visual to a presentation. They want to ensure that any changes made to the original file within its source location are automatically updated in the presentation. Which method should they use when adding the visual to their presentation?

1 / 1 point

- ☐ Copy and paste
- ☐ Embed
- ☒ Link
- ☐ Screenshot

✓ Correct

5. A data analyst at an investment firm uses data to identify stocks that have the potential to become more valuable. The analyst shares this information with investment managers in a presentation that uses data visualizations and storytelling techniques to make the findings clear and convincing. What aspect of data storytelling does this scenario describe?

1 point

- ☒ Takeaways
- ☐ Narrative
- ☐ Spotlighting
- ☐ Setting

✗ Incorrect

Review [the video about communicating about data analysis](#) ↗.

6. What Tableau tool can be used to limit the data displayed on a dashboard in order to save stakeholders time and effort?

1 / 1 point

- ☒ Pre-filtering
- ☐ Pre-sorting
- ☐ Pre-sizing
- ☐ Pre-building

✓ Correct

7. Which of the following statements correctly describe presentation best practices? Select all that apply.

1 / 1 point

- ☒ The plot creates tension in the current situation.

✓ Correct

- ☐ The setting depicts a challenge, an inefficient process, or a new opportunity.

- ☒ The aha moment involves sharing recommendations.

✓ Correct

- ☒ The big reveal highlights how data can be used to solve the problem.

✓ Correct

8. You prepare to communicate to clients about an analysis project. You consider how to connect with them and convince them to view the insights as you do. What aspect of data storytelling does this scenario describe?

1 / 1 point

- ☐ Theme
- ☒ Engagement
- ☐ Discussion
- ☐ Takeaways

✔ Correct

3rd Attempt:

1. A data professional working for a large retail chain analyzes customer purchase data to identify trends and patterns. While reviewing a scatterplot of purchase frequency versus amount, the analyst notices a cluster of data points far away from the main trendline. What should they do with this outlier?

1 / 1 point

- ☒ Determine whether it is an important observation
- ☐ Drop it from the scatterplot
- ☐ Hide it from the scatterplot
- ☐ Move it closer to the main trendline

✔ Correct

2. Fill in the blank: Charts, graphs, and other dashboard elements should be _____, which means they are balanced and make good use of available space.

1 / 1 point

- ☒ cohesive

✔ Correct

- ☐ complete
- ☐ clean
- ☐ constant

3. You are building a dashboard in Tableau. To create a design in which items can be layered over other objects, which layout should you choose?

1 / 1 point

- ☒ Floating
- ☐ Tiled
- ☐ Layered
- ☐ Itemized

✔ Correct

4. A data analyst wants to be able to edit a presentation visual directly. In addition, they do not want it to update automatically in other places. Which method should they use when adding the visual to their presentation?

1 / 1 point

- ☐ Embed
- ☒ Copy and paste
- ☐ Link
- ☐ Screenshot

✔ Correct

5. A data analyst at an e-commerce company uses data to identify which customers are most likely to make a purchase. The analyst shares this information with the marketing team in a report that uses data visualizations and storytelling techniques to make the findings clear and actionable. What aspect of data storytelling does this scenario describe?

1 point

- ☐ Narrative
- ☒ Takeaways
- ☐ Setting
- ☐ Spotlighting

✘ Incorrect

Review [the video about communicating about data analysis](#) ↗.

6. What Tableau tool can be used to limit the data displayed on a dashboard in order to focus stakeholders on the most important dashboard data?

1 / 1 point

- ☐ Pre-sorting
- ☐ Pre-sizing
- ☐ Pre-building
- ☒ Pre-filtering

✔ Correct

7. Which of the following statements correctly describe presentation best practices? Select all that apply.

1 / 1 point

☒ The plot creates tension in the current situation.

✔ Correct

☒ The setting describes what's going on, how often it's happening, what tasks are involved, and other background information.

✔ Correct

☒ An effective presentation supports the data storytelling narrative.

✔ Correct

☐ The characters are the analytics team members.

8. You prepare to communicate to stakeholders about an analysis project. You consider how to capture and hold people's interest and attention. What aspect of data storytelling does this scenario describe?

1 / 1 point

☒ Engagement

☐ Discussion

☐ Theme

☐ Takeaways

✔ Correct
