

Module 3 challenge

1. A junior data analyst at a manufacturing company analyzes product quality data to identify potential issues. While reviewing a scatterplot of product defect rate versus production batch, the analyst notices a data point far above the average defect rate. What should they do with this outlier?

1 / 1 point

- ☐ Hide it from the scatterplot
- ☐ Drop it from the scatterplot
- ☐ Move it closer to the main trendline
- ☒ Determine whether it is an important observation

✓ Correct

2. Fill in the blank: Charts, graphs, and other dashboard elements should be _____, which means they are balanced and make good use of available space.

1 / 1 point

- ☐ constant
- ☐ complete
- ☐ clean
- ☒ cohesive

✓ Correct

3. You are building a dashboard in Tableau. To create a design in which items can be layered over other objects, which layout should you choose?

1 / 1 point

- ☐ Tiled
- ☐ Layered
- ☐ Itemized
- ☒ Floating

✓ Correct

4. A data analyst adds a visual to a presentation. They want to ensure that any changes made to the original file within its source location are automatically updated in the presentation. Which method should they use when adding the visual to their presentation?

1 / 1 point

- ☐ Copy and paste
- ☒ Link
- ☐ Embed
- ☐ Screenshot

✓ Correct

5. A data analyst at a hospital uses data to show that patients who receive a certain type of treatment have a significantly better chance of making a full recovery. The analyst shares this information with hospital administrators in a presentation that uses data visualizations and storytelling techniques to make the findings clear and compelling. What aspect of data storytelling does this scenario describe?

1 / 1 point

- ☐ Setting
- ☒ Narrative
- ☐ Takeaways
- ☐ Spotlighting

✓ Correct

6. What Tableau tool can be used to limit the data displayed on a dashboard in order to focus stakeholders on the most important dashboard data?

1 / 1 point

- ☒ Pre-filtering
- ☐ Pre-sorting
- ☐ Pre-building
- ☐ Pre-sizing

✓ Correct

7. Which of the following statements correctly describe presentation best practices? Select all that apply.

1 / 1 point

☐ The plot includes recommendations from the data insights.

☒ The aha moment involves sharing recommendations.

✔ Correct

☒ The characters are the people affected by the story, such as stakeholders, customers, or clients.

✔ Correct

☒ The setting describes background information about the data project and the current situation.

✔ Correct

8. You prepare to communicate to clients about an analysis project. You consider how to connect with them and convince them to view the insights as you do. What aspect of data storytelling does this scenario describe?

1 / 1 point

☐ Discussion

☒ Engagement

☐ Theme

☐ Takeaways

✔ Correct
