

Self-Reflection: Examples of great presentations

Activity Overview

Now that you have been introduced to a few presentation tips, you can pause for a moment to consider what you are learning. In this self-reflection, you will first get a quick recap of the McCandless method. Then, you'll explore examples of great presentations to help you develop your own ideas about how to design and deliver presentations. Then, you will consider your thoughts about what makes a good presentation and respond to brief questions.

This self-reflection will help you develop insights into your own learning and prepare you to apply your knowledge of presentation best practices to your own presentations. As you answer questions—and come up with questions of your own—you will refine your understanding and reinforce your learning. You've done the hard work, so make sure to get the most out of it: This reflection will help your knowledge stick!

Follow the instructions to complete each step of the activity. Then answer the question at the end of the activity before going to the next course item.

As you look at examples in the next section of this activity, ask yourself: How do these presentations use the McCandless method?

As a refresher, the McCandless method is a set of guidelines for presentations. It suggests that you start with broad, general ideas and then work your way into the details.

The steps of the McCandless method include:

1. Introduce the graphic by name
2. Answer obvious questions before they're asked
3. State the insight of your graphic

4. Call out data to support that insight
5. Tell your audience why it matters

TED Talks are short, spoken messages with important ideas. Take some time to watch the three TED talks linked below, which were carefully selected as model examples of great presentations. As you watch the videos, ask yourself how they each show characteristics of an effective presentation:

1. [The 3 bones of networking](#)
2. [Grit: The power of passion and perseverance](#)
3. [Looking for a job? Highlight your ability, not your experience](#)

Click the following links to see excellent examples of slide deck presentations. As you view each deck, ask yourself which characteristics of the slide deck make the presentation so effective.

1. [Demystifying value: The importance of lifetime value](#) (make a copy or download from the file below)

2. [Airbnb pitch deck from 2008](#)

1. Reflection

1 / 1 point

Consider each of the TED Talks and slide decks from the list above:

- Which presentation was your favorite?
- Which three characteristics made that presentation your favorite? Why?

Now, write 2-3 sentences (40-60 words) in response to each of these questions. Enter your response in the text box below.

My presentation at the last one is favorite, which is Looking for a job? Highlight your ability, not your experience.

In the "which is looking for a job? Highlight your ability, not your experience" they have followed the McCandless method, where they mentioned the "Answer obvious questions before they're asked" and "state the insight of your graphic," and "Tell your audience why it matters". All of these reasons I have decided that my favorite presentation is "which is looking for a job? Highlight your ability, not your experience".

Feedback

Great work reinforcing your learning with a thoughtful self-reflection! A good reflection on this topic would describe which presentation was your favorite, why it was your favorite, and how it uses best practices from the McCandless method.

As you learn more about how to craft effective presentations, you will get better at identifying *why* they are effective. Earlier, you learned about the McCandless method and how to bring your presentation from general ideas to specific information. Now, you will be able to identify examples of this in real presentations. Going forward, you can apply the principles you've learned to create your own great presentations as a data analyst.
