

Module 4 challenge

1st Attempt:

1. You perform a colleague test prior to a presentation. A coworker says that they do not understand one of your graphs. What strategies might you use to improve your presentation? Select all that apply.

1 / 1 point

☒ Redesign the graph

✔ Correct

☐ Remove the graph

☐ Move the graph to a later slide

☒ Elaborate on the data from the graph

✔ Correct

2. Fill in the blank: A _____ guides the audience through a presentation, creating logical connections to the business task and metrics.

1 / 1 point

☐ hypothesis

☐ graphic

☐ finding

☒ framework

✔ Correct

3. You give a presentation about technical operations management concepts to an audience that knows very little about the subject. Which McCandless Method concept helps ensure your audience does not become distracted by something they don't understand?

1 / 1 point

- ☒ Answer obvious questions before they're asked
- ☐ Call out data to support the insights
- ☐ State the insight of the graphic
- ☐ Tell the audience why the graphic matters

✔ Correct

4. Which of the following statements accurately describe presentation best practices? Select all that apply.

0.5 / 1 point

- ☒ Picturing yourself giving the presentation is an effective preparation strategy.

✔ Correct

- ☒ When introducing a visualization, give the audience 30 seconds to process it before speaking.

✘ This should not be selected
Review [the video about presentation tactics](#).

- ☐ When introducing a chart, ask "Are there any questions about this chart?"

- ☒ Begin with the broader concepts of your analysis.

✔ Correct

5. After giving a presentation about temperature sensor data, your stakeholders express concern about the sensors that generated the data for your analysis. They want to understand whether the data the sensors provided is timely. Which kind of objection are they making?

1 point

- ☒ Findings
- ☐ Presentation skills
- ☐ Data
- ☐ Analysis

✘ Incorrect
Review [the video about types of objections](#).

Answer: Data

6. Fill in the blank: The second slide of a presentation should state the analysis project's _____, including its objective and why it is important to the business.

1 point

- ☐ agenda
- ☒ analysis
- ☐ recommendations
- ☐ purpose

✗ Incorrect

Review [the reading about sharing data findings](#). [↗](#)

Answer: Purpose

7. A data professional at a public school system is asked to investigate learning software. The analyst believes the software will improve test scores. They plan to prove this theory by analyzing test scores, student engagement data, and teacher feedback. What does this scenario describe?

1 / 1 point

- ☐ Disproving a trend
- ☐ Modifying a statistic
- ☐ Addressing a business task
- ☒ Making a hypothesis

✓ Correct

8. What strategies can a data professional use to convey confidence during a presentation? Select all that apply.

1 / 1 point

- ☒ Make eye contact

✓ Correct

- ☒ Stand up straight

✓ Correct

- ☒ Be mindful of nervous habits

✓ Correct

- ☐ Take long pauses between sentences

2nd Attempt:

1. During a colleague test, a coworker asks a question about a section of your analysis. Addressing their concern will require adding information you had not planned to include. What strategies might you use to improve your presentation? Select all that apply.

1 / 1 point

☒ Expand your presentation by adding the information

✔ Correct

☐ Leave the presentation as-is

☒ Anticipate that stakeholders may have the same question

✔ Correct

☐ Remove the section of the analysis that prompted the question

2. Fill in the blank: A _____ guides the audience through a presentation, creating logical connections to the business task and metrics.

1 / 1 point

- ☐ graphic
- ☐ hypothesis
- ☒ framework
- ☐ finding

✔ Correct

3. You give a presentation about statistical modeling to an audience that knows little about this very technical subject. Which McCandless Method concept will help ensure your audience does not become confused while trying to understand the presentation?

1 / 1 point

- ☐ Call out data to support the insights
- ☒ Answer obvious questions before they're asked
- ☐ State the insight of the graphic
- ☐ Tell the audience why the graphic matters

✔ Correct

4. Which of the following statements accurately describe presentation best practices? Select all that apply.

0.8 / 1 point

- ☐ When introducing a chart, ask "Are there any questions about this chart?"
- ☐ When introducing a visualization, give the audience 30 seconds to process it before speaking.
- ☒ Picturing yourself giving the presentation is an effective preparation strategy.

✓ Correct

- ☒ Begin with the broader concepts of your analysis.

✓ Correct

✗ You didn't select all the correct answers

5. After giving a presentation about website performance, your stakeholders express concern about data integrity. They are worried about the effectiveness of the data transformations you performed during analysis. Which kind of objection are they making?

1 / 1 point

- ☐ Presentation skills
- ☐ Findings
- ☐ Analysis
- ☒ Data

✓ Correct

6. Fill in the blank: The second slide of a presentation should state the analysis project's _____, including its objective and why it is important to the business.

1 / 1 point

- ☒ purpose
- ☐ analysis
- ☐ recommendations
- ☐ agenda

✓ Correct

7. A data professional at a public school system is asked to investigate learning software. The analyst believes the software will improve test scores. They plan to prove this theory by analyzing test scores, student engagement data, and teacher feedback. What does this scenario describe?

1 / 1 point

- ☐ Modifying a statistic
- ☒ Making a hypothesis
- ☐ Addressing a business task
- ☐ Disproving a trend

✓ Correct

8. What strategies can a data professional use to convey confidence during a presentation? Select all that apply.

1 / 1 point

- ☐ Take long pauses between sentences
- ☒ Be mindful of nervous habits

✓ Correct

- ☒ Make eye contact

✓ Correct

- ☒ Stand up straight

✓ Correct
