

Case Study 1: How does a bike-share navigate speedy success?

In this case study, you will perform data analysis for a fictional bike-share company in order to help them attract more riders. Along the way, you'll perform typical tasks of a junior data analyst while following the steps of the data analysis process: Ask, Prepare, Process, Analyze, Share, and Act. By the time you're done, you'll have a portfolio-ready case study to help you demonstrate your knowledge and skills to potential employers!
