

Resources to explore other case studies

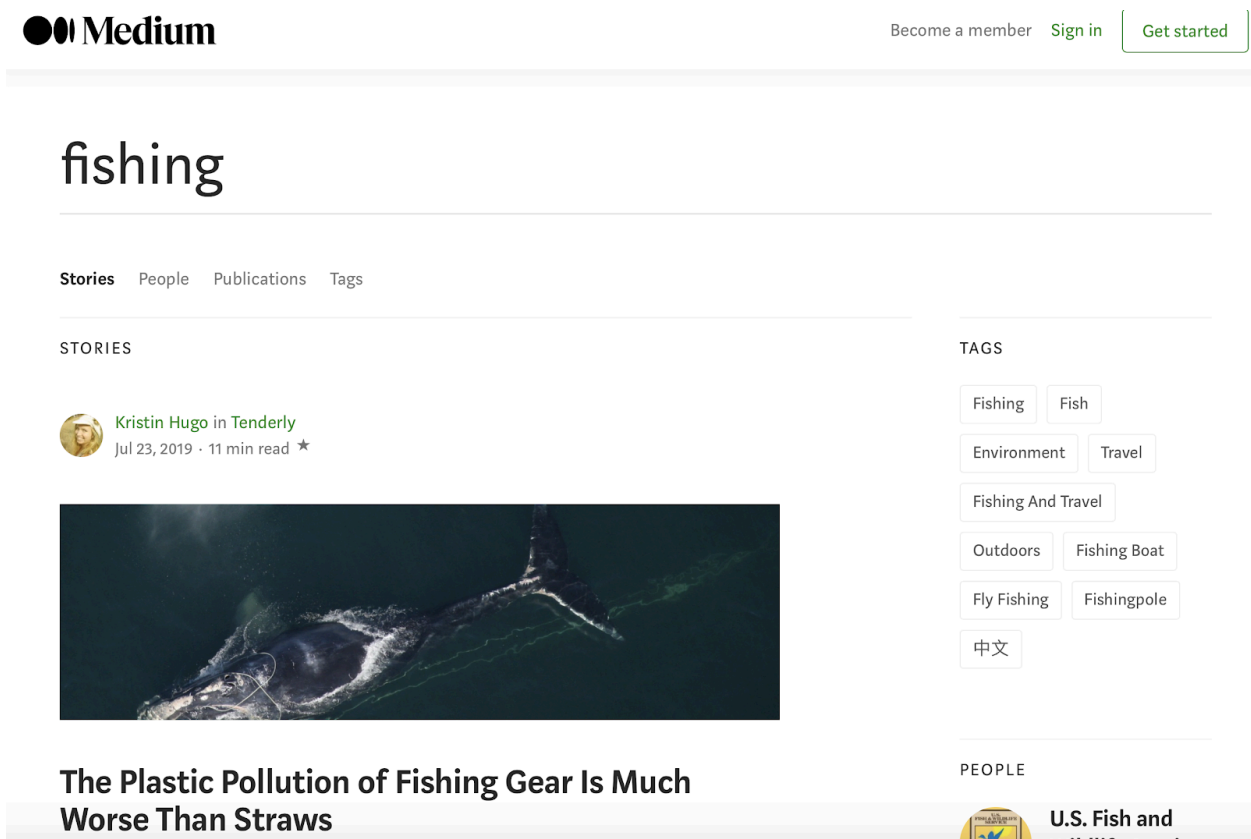

Inspiration is everywhere. You can get ideas for a case study to include in your portfolio from your hobbies, travels, children, volunteer work, and even something as common as waiting in line! For example, you might create a case study examining the effect of customer wait times on a company's sales.

Let's imagine you enjoy fishing. You can create a case study for your portfolio that relates to your hobby. It is helpful to browse Medium, GitHub, Tableau, and Kaggle to get an idea of what other people have already created and find some inspiration.

Searching on Medium

To search for case studies on Medium, go to medium.com/search.

Enter the term *fishing*, as an example. Medium will pull up a bunch of articles that are related to fishing. You can also explore topics related to fishing by clicking other tags on the right: Environment, Travel, Fishing and Travel, Outdoors, and more.

The screenshot shows the Medium website interface for a search result. At the top, the Medium logo is on the left, and links for 'Become a member', 'Sign in', and 'Get started' are on the right. Below the navigation bar, the word 'fishing' is displayed in a large, lowercase font. Underneath, there are tabs for 'Stories', 'People', 'Publications', and 'Tags'. The 'Stories' tab is selected. On the left side, under the 'STORIES' heading, there is a profile picture of Kristin Hugo, followed by the text 'Kristin Hugo in Tenderly', the date 'Jul 23, 2019', and '11 min read' with a star icon. Below this is a large image showing a close-up of a fish's head with a piece of clear plastic (likely a straw) stuck in its mouth. Under the image, the article title 'The Plastic Pollution of Fishing Gear Is Much Worse Than Straws' is visible. On the right side, under the 'TAGS' heading, there is a list of tags: 'Fishing', 'Fish', 'Environment', 'Travel', 'Fishing And Travel', 'Outdoors', 'Fishing Boat', 'Fly Fishing', 'Fishingpole', and '中文'. Below the tags, under the 'PEOPLE' heading, there is a profile picture of the U.S. Fish and Wildlife Service and the text 'U.S. Fish and Wildlife Service'.

Searching on GitHub

To search for case studies on GitHub, go to github.com/search.

If you enter *fishing* in the search field, GitHub returns thousands of results. If you enter *fishing case study* in the search field, GitHub returns fewer results.

Searching on Tableau

To search for case studies in Tableau, go to public.tableau.com and use the search bar at the top of the page.

For example, click the search icon (the magnifying glass) and enter *fishing*. The term *fishing* returns thousands of results.

R Markdown - Fishing by Countries

by Sergey Cherkasov

Check out the different notebooks to discover datasets that might work well for your case study. Note that, even if the notebooks don't feature Python, they may still include useful datasets that you can analyze on your own using Python. For example, the *R Markdown - Fishing by Countries* notebook includes a public domain dataset called *Annual Nominal Fish Catches: Explore the impact of overfishing in the Northeast Atlantic region*.

The screenshot shows the Kaggle website interface. On the left is a navigation sidebar with links to Home, Compete, Data, Notebooks, Communities, Courses, and More. The main content area displays the 'Annual Nominal Fish Catches' dataset by Victor Genin, updated a year ago (Version 2). The dataset description states it provides annual nominal catches of more than 200 species of fish and shellfish in the Northeast Atlantic region, submitted by the ICES member countries between 2006 and 2014. The 'Data Explorer' section shows a list of files: country_codes.csv (2.16 KB), fish_catches.csv, fishing_area.xml, and species.txt. The 'country_codes.csv' file is selected, showing its details and a preview of the data.

You might have just found a great dataset to use to create your own case study. You wouldn't want to repeat the same analysis related to overfishing, but the data could reveal another pattern worth analyzing.

Key takeaway

You can use the same procedure completed for the fishing example to search for case studies and data about any other topic that interests you. By including case studies that are personally meaningful to you in your portfolio, you give prospective employers a better sense of the kind of person you are and what inspires your work.
