

Resources for Google Data Analytics Certificate graduates

Congratulations on completing the Google Data Analytics Certificate! Your dedication has unlocked exclusive career-boosting resources and benefits. Access and share your badge of completion, receive personalized career guidance, and sharpen your interview skills.

To claim these at no cost resources, simply access each using the same email address you used when registering for the certificate on Coursera. Please note that these benefits are only available to graduates who have completed all eight courses in the Google Data Analytics Certificate program.

- **Complete the Google Data Analytics Certificate (Done!)**
- **Claim your Google Data Analytics badge and share it with your professional network.**
 - Look for an email from Credly (admin@credly.com) within one week of completing the certificate.
 - Claim your badge on Credly's Acclaim platform using the email address linked to your Coursera account. You'll need to opt in to share your information for the purposes of badge issuing.
 - Add the badge to your LinkedIn to highlight your skills by following the steps in this [Credly article](#) or [video tutorial](#).

- **Showcase your new skills and expand your professional network:** Share your accomplishment on social media using our [sample posts and prompts](#), and include #GrowwithGoogle for greater visibility.
- **Connect with a community of learners and discover new opportunities:** Follow Grow with Google on LinkedIn to join a network of like-minded individuals and explore further learning possibilities.
- **Get no-cost interview prep, coaching, and resume support (US graduates only).** Google is giving certificate graduates like you free access to career support from [CareerCircle](#), including a resume builder and interview preparation resources to help you land your next job. Plus, you'll get access to free 1-on-1 career coaching and thousands of job postings from top employers. You must be eligible to work in the U.S. to unlock this resource.
- **Explore career possibilities with [Career Dreamer](#).** Career Dreamer is an experimental tool that uses AI to help you uncover your skills and personalized career paths based on your unique experiences and interests. Career Dreamer can help you:
 - Draft a professional story that showcases the value you bring to the workforce.

- Explore career paths that might align with your skills and interests.
 - Take steps toward your career goals, like creating a cover letter or resume.
- **Learn to navigate your job search efficiently and confidently using AI.** All Google Career Certificates include an optional new course, Accelerate Your Job Search with AI. This course will guide you to use AI to create a job search plan, professional pitch, resume, and more. This optional course is listed next in your certificate program, and you can access it [here](#).
- **Inspire others by sharing your story.** Stories from successful graduates, like you, can encourage the next generation of learners to pursue their passions. In addition, your feedback helps us improve the certificate program. Fill out [this short survey](#) to tell us about your journey.
