

Module 1 challenge

1. Which of the following statements correctly describe data and data analysis? Select all that apply.

0.75 / 1 point

- ☐ Transforming data is part of the data analysis process.
- ☐ Data analysis is the creation of data.
- ☒ Data is a collection of facts.

✔ Correct

- ☒ One goal of data analysis is to drive informed decision-making.

✔ Correct

You didn't select all the correct answers

2. Fill in the blank: Data science involves using _____ data to create new ways of modeling and understanding the unknown.

1 / 1 point

- ☐ transformed
- ☐ processed
- ☒ raw
- ☐ clean

✔ Correct

3. Which of the following activities are elements of data-driven decision-making? Select all that apply.

0.75 / 1 point

- ☐ Remove data insights that stem from human intuition
- ☒ Figure out the business need or problem to be solved

✔ Correct

- ☐ Ask subject-matter experts to review the results
- ☒ Find and analyze relevant data

✔ Correct

You didn't select all the correct answers

4. A pet shelter wants to receive 15% more donations at this year's holiday fundraiser than were given in previous years. Data team members look into past donations compared to desired donations for this holiday season. They then develop strategies to bridge the difference between the two. What does this scenario describe?

1 / 1 point

- ☐ Guiding business decisions
- ☒ Gap analysis
- ☐ Future analysis
- ☐ Planning

✔ Correct

5. Fill in the blank: Data analysts use a problem-oriented approach in order to identify, _____, and solve problems.

1 / 1 point

- ☒ describe
- ☐ create
- ☐ modify
- ☐ obscure

✓ Correct

6. Which of the following scenarios demonstrate analytical thinking? Select all that apply.

1 / 1 point

- ☒ You select and design a graph to communicate your data in an appropriate and accessible way.

✓ Correct

- ☒ You notice that two pieces of data trend in the same direction and investigate them further to check for correlation.

✓ Correct

- ☒ You identify and define a problem, then solve it by using data in an organized manner.

✓ Correct

- ☐ You determine your hypothesis to be true because there is nothing in your data to contradict it.

7. A data professional working at a nonprofit prepares for a project about community forestry. They use their analytical thinking skills to determine what they want to achieve with the data. They also prioritize staying focused and on track. Which aspect of analytical thinking does this scenario describe?

1 / 1 point

- ☐ Intuition-driven thinking
- ☒ Strategic thinking
- ☐ Collaborative thinking
- ☐ Visualization

✔ Correct

8. What is the purpose of the five whys?

1 / 1 point

- ☐ To figure out a problem's consequences
- ☐ To understand the impact of a problem
- ☒ To reveal the root cause of a problem
- ☐ To identify key symptoms of a problem

✔ Correct

9. A data professional considers how they can best manage the key elements of an analysis project. They confirm that team members know how to use the right data, ensure there's a clear path to a solution, and check that the right technology is in place. Which analytical skill does this scenario describe?

1 / 1 point

- ☐ Technical mindset
- ☐ Curiosity
- ☐ Understanding context
- ☒ Data strategy

✔ Correct

10. Which of the following examples demonstrate data-driven decision-making? Select all that apply.

1 / 1 point

- ☒ A weather forecaster refers to information about past extreme weather in order to better predict future events.

✔ Correct

- ☒ An online retailer surveys customers to develop new products that are more likely to be successful.

✔ Correct

- ☐ A transportation company prioritizes the preferences of local politicians when outlining routes and schedules.

- ☒ A government agency uses facts documented in police reports to help develop crime-prevention strategies.

✔ Correct
