

Module 2 challenge

1. Which of the following activities are part of the manage phase of the data life cycle? Select all that apply.

1 / 1 point

☒ Reflect on how to care for data

✓ Correct

☐ Use the data solve problems

☒ Decide where to store data

✓ Correct

☒ Select tools to keep data secure

✓ Correct

2. Which spreadsheet feature uses a set of instructions to perform calculations, such as multiplication or division?

1 / 1 point

☐ Function

☒ Formula

☐ Filter

☐ Format

✓ Correct

3. Which of the following statements correctly describe the archive and the destroy phases of the data life cycle? Select all that apply.

1 / 1 point

- ☐ The best way to protect private data at the end of a project is to archive it for future use.
- ☒ A key reason for destroying data is to protect sensitive customer information.

✔ Correct

- ☒ Shredders may be used to destroy data that is on paper.

✔ Correct

- ☒ Archiving means storing data, although it may not be used again.

✔ Correct

4. What tasks may occur during the ask step of the data analysis process? Select all that apply.

1 / 1 point

- ☒ Stay engaged by having a dialogue with stakeholders

✔ Correct

- ☒ Consider the current state compared to the ideal state

✔ Correct

- ☒ Define the problem to be solved

✔ Correct

- ☐ Select appropriate tools for cleaning the data

5. Fill in the blank: During the prepare step of the data analysis process, data is _____ and stored for analysis.

1 / 1 point

- ☐ interpreted
- ☐ modified
- ☐ shared
- ☒ collected

✓ Correct

6. A data team at a timber company works on a project aimed at planting more trees and eliminating deforestation. They discuss what type of data they need and how it will be managed throughout its life cycle. What phase of the data life cycle does this scenario describe?

1 / 1 point

- ☐ Manage
- ☒ Plan
- ☐ Archive
- ☐ Capture

✓ Correct

7. Data analysts at a home appliance retailer have a dataset containing information about product repairs. They look for and resolve any errors within the dataset. Then, they transform the data into a format that will enable them to get useful insights about repair trends. What step of the data analysis process does this scenario describe?

1 / 1 point

- ☐ Analyze
- ☒ Process
- ☐ Ask
- ☐ Share

✓ Correct

8. Fill in the blank: During the _____ step of the data analysis process, data analytics professionals use tools such as query languages to drive informed decision-making.

1 / 1 point

- ☐ act
- ☐ process
- ☒ analyze
- ☐ share

✓ Correct

9. What are some key benefits of data visualizations? Select all that apply.

1 / 1 point

☐ Data visualizations do not require labels or descriptions.

☒ Maps help people identify patterns in data.

✔ Correct

☒ Complex data can be shared more effectively with nontechnical audiences in visualizations.

✔ Correct

☒ Data visualizations help people gain insights from data more quickly.

✔ Correct

10. Fill in the blank: A high-tech manufacturer acquires data from an outside consumer tech association database and its own documentation about product features and pricing. This work occurs during the _____ phase of the data life cycle.

1 / 1 point

☐ destroy

☒ capture

☐ manage

☐ analyze

✔ Correct
