

## Module 3 challenge

1. In the following spreadsheet, what type of tree is in cell D3?

1 / 1 point

| (n/a) | A           | B              | C         | D            | E           |
|-------|-------------|----------------|-----------|--------------|-------------|
| 1     | Ginkgo      | Weeping willow | Sycamore  | Bay laurel   | Pistachio   |
| 2     | Papaya      | Maple          | White oak | European ash | Pecan       |
| 3     | Cedar       | Burflower      | Spruce    | Redwood      | Beech       |
| 4     | Birch       | Cottonwood     | Clove     | Cacao        | Bristlecone |
| 5     | Rubber tree | Brazil nut     | Walnut    | Pine         | Palm        |

- ☐ Beech
- ☐ Palm
- ☐ Sycamore
- ☒ Redwood

✓ Correct

2. In the following query, what will be retrieved from the database?

1 / 1 point

```
SELECT *  
FROM facility_A  
WHERE specialist = 'engineering'
```

- ☐ All specialists in facility A
- ☒ All engineering specialists in facility A
- ☐ All of facility A
- ☐ All engineering specialists in all facilities

✓ Correct

3. Which of the following statements accurately describe spreadsheet attributes and observations? Select all that apply.

1 / 1 point

☒ An observation includes all of the attributes contained in its row.

✔ Correct

☐ Observations are characteristics or qualities of data.

☒ Attributes are also referred to as column headers.

✔ Correct

☒ Column labels are attributes.

✔ Correct

4. A data team at a public university wants to communicate to stakeholders about which foreign language courses are most popular with students. They create a data visualization that identifies the 38 different courses, then shows the number of students enrolled in each one. What type of data visualization should they create?

0 / 1 point

☐ Bar chart

☒ Donut chart

☐ Pie chart

☐ Line chart

✘ Incorrect

Review [the reading about data visualization](#).

5. When working in a spreadsheet, what is the correct syntax for a formula that adds the value in cell A1 to the value in cell B1?

1 / 1 point

☐ A1+B1=

☐ =A1 , B1

☒ =A1+B1

☐ A1 , B1

✔ Correct

6. Fill in the blank: The SQL clause **SELECT \*** is used to retrieve \_\_\_\_\_ from a particular table.

1 / 1 point

- ☐ all duplicate data
- ☒ all data
- ☐ the data in certain rows
- ☐ the data in certain columns

✓ Correct

7. In the following query, which clause indicates the table from which to retrieve data?

1 / 1 point

```
SELECT *  
FROM Wood  
WHERE finish = 'stain'
```

- ☐ **SELECT \***
- ☐ = 'stain'
- ☒ **FROM Wood**
- ☐ **WHERE finish**

✓ Correct

8. Which text wrapping feature allows the text within a spreadsheet cell to continue into the next cell, if it is empty.

1 / 1 point

- ☒ Overflow
- ☐ Wrap
- ☐ Clip
- ☐ Fill

✓ Correct

9. Which of the following statements accurately describe data visualizations and visualization tools? Select all that apply.

1 / 1 point

☒ Spreadsheets have visualization tools that enable data professionals to create line or bar charts.

✔ Correct

☐ The process used for analyzing the data should not influence the type of visualization ultimately selected.

☒ Tableau makes it possible to integrate data into dashboard-style visualizations.

✔ Correct

☒ When working with the programming language R, an integrated developer environment enables the creation of data visualizations.

✔ Correct

10. What spreadsheet feature would a data analyst use to alphabetize the last names in column B?

1 / 1 point

| (n/a) | A        | B        | C  |
|-------|----------|----------|----|
| 1     | Maurice  | Perth    | 72 |
| 2     | Kimberly | O'Neill  | 35 |
| 3     | Thomas   | Bower    | 48 |
| 4     | Ning     | Minnella | 28 |
| 5     | Sofie    | Raduazzo | 62 |
| 6     | Elsa     | Burge    | 31 |

☐ Chart editor

☐ Formatting

☒ Sort range

☐ Dragging

✔ Correct
