

Wrap-up

You've learned so much already and are making great strides toward your future career.

You've discovered the fascinating process of migrating to the cloud.

And how important it is to choose the right data system environment.

You also learned about the cloud's impact on both the data analytics field and other industries.

Then, you reviewed costs and billing models, exploring cloud cost optimization and its many benefits.

You also learned about the costs of storage, running queries, resource provisioning, and the different billing models.

This know-how will help you guide any employer toward valuable savings.

Lastly, you got an overview of cloud architecture and considered how it's a blueprint for everything that's possible in the incredible cloud.
