

Welcome to module 4

Hi there!

Welcome to the next stage of your cloud data analytics journey.

In this section, you're going to dive deeper into data analyst roles and responsibilities; cloud data tools; and data, identity, and access management.

You'll first check out the unique ways the data analyst's role operates in cloud data analytics.

Then, you'll learn more about other key team members who interact with data.

This will help you collaborate like a pro!

Next, you'll explore Google Cloud's data and analytics portfolio.

You'll get a high-level introduction to the tools: BigQuery, Looker, Dataproc, and Dataflow.

Your final section will focus on data access management.

You'll understand why this is an important part of the data analyst's role.

You'll also learn about identity access management.

We're going to cover a lot in this section, and it will be a great glimpse into the day-to-day activities of your future role in the cloud.

Let's do it!
